Same live spec (\$5,000, 1:10, 0.09 cap, real ticks) · ranked by CURRENT-regime result · 2026-08-31

#1 CK_GFT_Fast v17

WORKS IN CURRENT MARKET

Current 6 months net

+\$2,175

Current regime (Mar-Aug 2026)

Initial Deposit	5,000.00	Profit Factor	1.39
Total Net Profit	2,175.02	Expected Payoff	5.23
Gross Profit	7,796.20	Recovery Factor	2.40
Gross Loss	-5,621.18	Balance DD Maximal	907.14 (11.43%)
Total Trades	416	Profit Trades %	66.83%
Largest profit trade	309.50	Largest loss trade	-184.32
Average profit trade	28.04	Average loss trade	-41.33

Last 12 months

Initial Deposit	5,000.00	Profit Factor	1.49
Total Net Profit	5,807.73	Expected Payoff	6.11
Gross Profit	17,654.98	Recovery Factor	7.30
Gross Loss	-11,847.25	Balance DD Maximal	795.84 (9.21%)
Total Trades	951	Profit Trades %	66.25%
Largest profit trade	427.65	Largest loss trade	-215.04
Average profit trade	28.02	Average loss trade	-37.97

Why #1: the only strategy still profitable in the current market; passes cost-stress + forward tests. Small risk-based lots, so \$5k is fine. **Status:** demo-forward (no real money yet).

#2 FIX09 (CK_GOLD_PRO)

TREND-ONLY - loses now

Current 6 months net (fresh \$5k)

\$-1,661

Current regime (Mar-Aug 2026)

Initial Deposit	5,000.00	Profit Factor	0.29
Total Net Profit	-1,661.23	Expected Payoff	-207.65
Gross Profit	683.82	Recovery Factor	-0.93
Gross Loss	-2,345.05	Balance DD Maximal	1,787.49 (34.87%)
Total Trades	8	Profit Trades %	25.00%
Largest profit trade	370.89	Largest loss trade	-840.42

Average profit trade	341.91	Average loss trade	-390.84
----------------------	--------	--------------------	---------

Last 12 months

Initial Deposit	5,000.00	Profit Factor	1.37
Total Net Profit	8,740.25	Expected Payoff	30.04
Gross Profit	32,549.88	Recovery Factor	2.10
Gross Loss	-23,809.63	Balance DD Maximal	4,155.69 (23.24%)
Total Trades	291	Profit Trades %	24.74%
Largest profit trade	2,505.87	Largest loss trade	-840.42
Average profit trade	452.08	Average loss trade	-109.72

Why #2: huge in a trending market (last 12m +\$8,740), but in the current regime it loses and, on \$5k with a fixed 0.09 lot, the account margin-locks after a few losses (only 8 trades). Use only in a confirmed trend, on a bigger account.

Rejected (positive only in a past regime or over-optimized backtest)

Strategy	Out-of-sample net (50k)	Profit factor	Verdict
v23 (trend)	+2,512	1.12	REJECT - thin / regime-dependent
POC_VA (volume)	+2,433	1.06	REJECT - edge below cost
QT/CRT	-3,180	0.76	REJECT - no edge
QM/ICT	-3,325	0.50	REJECT - no edge

Historical MT5 real-tick simulation, not a promise of future results. Trade counts include partial-take-profit closes. No real money was traded; v17 proceeds to demo-forward validation. All runs recorded in a hash-chained ledger.
